If the household is reporting more than one source of income and there is a difference in how often the income is received, use the chart below to calculate the annual income. Add the annual income from all sources and divide by 12 to determine the total monthly income.

Instructions for calculating income:

* Annual income.

** Monthly income x 12 = annual income.

*** Twice per month income x 24 = annual income.

**** Every two weeks income x 26 = annual income.

***** Weekly income x 52 = annual income.

All numbers are rounded upward to the next whole dollar.
